GOVERNOR'S OFFICE
OF EMERGENCY SERVICES

SITUATION SUMMARY

SOC Activation for California Wildfires

- The State Operations Center (SOC) will be activating at Level 2 from 0900-1900 hours today and continuing through Sunday due to the wildfires burning throughout California. Per Coastal Region management, the Coastal REOC is also at level 2 from 0900 to 1900 hours this weekend. The Inland REOC remains activated at Level 1.

Governor Brown Proclaims State of Emergency in California to Bolster Wildfire Response

- With wildfires burning across the state – exacerbated by severe drought conditions and extreme weather – Governor Edmund G. Brown Jr. today declared a state of emergency in California to help mobilize additional firefighting and disaster response resources.
- “California’s severe drought and extreme weather have turned much of the state into a tinderbox,” said Governor Brown. “Our courageous firefighters are on the front lines and we’ll do everything we can to help them.”
- See link for the full text of the proclamation: <http://gov.ca.gov/news.php?id=19053>

Cal EOC Incident – 2014 Drought

- SOC / Inland REOC remains activated in support of 2014 Drought

Weather of Concern

- Fire weather is still a concern for northern California through today with localized thunderstorms and flash flooding expected for areas of central and southern California through the weekend.

Active Weather Warnings, Watches and Advisories by County:

http://www.wrh.noaa.gov/sto/brief/wwa_bc_cal.php

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

Monsoonal moisture streaming in from the south combined with instability from an upper level low approaching from the southwest will allow interior thunderstorms to remain a threat through early next week.

Medford Weather:

The hot temperatures and afternoon/evening thunderstorms will continue through the weekend. Friday was likely the hottest day over the area and a cooling trend will commence Saturday, but it will still be quite hot through the weekend.

Reno Weather:

Moisture is on the increase this weekend, bringing chances for showers and thunderstorms with gusty outflow winds and possibly a few lightning induced fire starts. Lightning and locally heavy rainfall will be the main threats from this weekend's storms. Afternoon temperatures will fall to near average on Sunday, with thunderstorm chances tapering off by Wednesday.

San Francisco Weather:

A cooling trend is expected to continue into the weekend as onshore flow increases and the marine layer deepens. No sign of organized rainfall through next week.

WEATHER

WEATHER SYNOPSIS BY REGION:

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:

Sacramento Weather:

A slow cooling trend continues into next week. Daytime highs will become near normal by Sunday and at or below normal much of next week. Scattered mountain thunderstorms can be expected through Monday as monsoon moisture is pulled northward. Dry conditions are expected throughout the other areas of the Sacramento Valley.

Hanford Weather:

Tropical moisture will flow northward over the Sierra through Sunday producing mainly afternoon and evening thunderstorms. A drying and cooling trend expected to start Sunday and continue through the week as upper level winds become more onshore.

SOUTHERN CALIFORNIA:

Los Angeles Weather:

Night through morning low clouds will persist at the coast with mostly clear skies over the rest of the area. Temperatures will be near normal through next week.

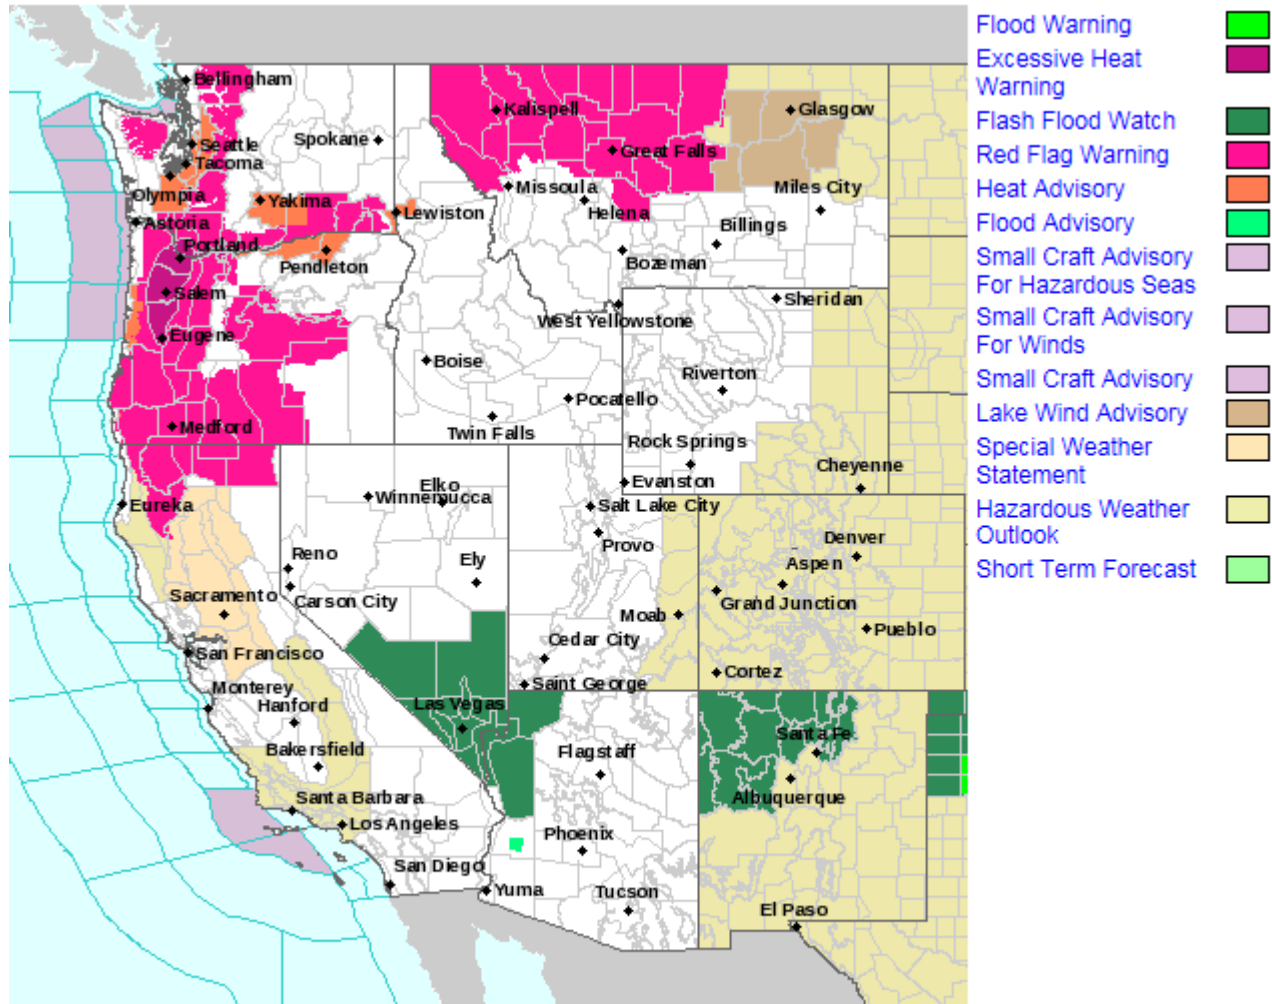

Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

A weak trough of low pressure off the West Coast will maintain drier southwest flow aloft across southern California through next week with lower level onshore flow and a marine layer bringing night and morning coastal low clouds and patchy fog inland to the Western Valleys. High temperatures will be near average with locally gusty west winds in the mountains and deserts each late afternoon through late evening.

Southeast California Weather:

Storm chances will be less today with chances limited to areas east of the lower Colorado River Valley. Further drying occurs next week with storm chances confined to the higher terrain southeastern California. Temperatures will hover near normal through next week.
